IN THE SPECIFICATION

Please replace the paragraph beginning at page 155, line 14 to page 156, line 2, with the following rewritten paragraph:

On the other hand, if the registration cancellation should be permitted as a result of the registration permission/inhibition decision at S194, then the group management server 32 performs a registration cancellation process of the content reproduction apparatus 20 of the registration cancellation object (S196). In particular, the group management server 32 specifies a record of the authenticated user in the group registration database 324 based on the terminal ID and so forth of the content processing apparatus 10 of the registration requesting source and deletes the device [[D]] ID of the content reproduction apparatus 20 of the registration calculation object from the record.

Please replace the paragraph beginning at page 290, line 18 to page 291, line 9, with the following rewritten paragraph:

Further, in the example of the title list 710 shown in FIG. 56C, the titles A and C of non-reproducible reproducible contents and the titles B, D and E of non-reproducible contents are displayed distinctly in different regions. In particular, the titles A and C of non-reproducible reproducible contents are displayed in a reproduction OK area 720 while the titles B, D and E of non-reproducible contents are displayed in a non-reproducible area 722. Consequently, the user can distinguish the reproducible contents and the non-reproducible contents from each other. Further, according to such a display example as just described, since reproducible/non-reproducible contents of the content reproduction apparatus 20 are displayed collectively, the user can collectively recognize reproducible/non-reproducible contents in the content reproduction apparatus 20.
